

LET CONNECTWISE CREATE AN EMERGENCY SERVER OR COMPLETELY RESTORE LOST DATA ... FASTER THAN EVER!

ConnectWise offers a comprehensive Backup & Disaster Recovery solution for Windows 2000, 2003 and 2008 servers featuring:

- Offsite, encrypted, compressed storage; ensures data security and regulatory compliance
- Quick standby server using Virtualization Technology
- Flexible recovery options including Exchange e-mail boxes
- Bare metal restores
- 24/7/365 basic monitoring of server health to ensure proper backups
- Restore down servers faster than ever
- Microsoft SQL 2000, 2003 and 2008 compatible

NAS Technology Makes the Difference

The key component in ConnectWise Backup & Disaster Recovery solution is our Network Attached Storage (NAS) device. Having outstanding virtualization capabilities, this device can be configured to function as a standby server in about an hour. Our unique appliance also replaces management-intensive, error-prone tape backups.

Features Include:

- **Near Real-Time Backups** – “Incremental Forever” technology backs up recent datasets and lets you reconstruct data as it stood at the end of 15-minute restoration points.
- **Onsite Virtual Server** – Our server virtualization technology allows your servers and applications to be restored and rebooted on the NAS device while your server is being repaired.
- **Intuitive and Flexible Restoration** – Incremental-based backup allows recovery of multiple versions of files, folders, messages and mailboxes.
- **A Complete Image** – An image of all hard drive partitions and data is generated and warehoused on the NAS device.
- **Secure Remote Storage** – The NAS device creates an independent 256-bit encrypted tunnel and transmits the data to 2 secure offsite data centers outside the local region.

Affordable Cost

We offer a price package that is all inclusive. Costs are bundled and include the NAS, Incremental Forever Methodology, file integrity checks, secure data transmission and remote storage.

Let ConnectWise help you keep your business operations protected and productive.

ConnectWise Backup & Disaster Recovery prevents IT calamities from becoming fatal to your business.

In fact, as far as your vital information is concerned, it's more likely to seem that the disaster never took place at all.

ENSURE BUSINESS CONTINUITY

Plan for the unexpected!
ConnectWise has business continuity solutions that can quickly get your business up and running again when bad things happen.
